linkedin.com/in/thomas-felmy-8137262b3

First-year engineering student, after two years of intensive preparatory classes in maths and physics (PCSI, then PSI*). I have been coding modelling projects since high school (Python, Ada): maze generation, physics simulation, games. A competitive swimmer for 14 years, I am now training for the Paris Marathon.

Education

2026 – 2029 **Master's-level engineering degree (Diplôme d'ingénieur), ENSEEIHT, Digital Sciences**
Toulouse INP · Year 1: imperative programming (Ada, C), computer architecture, probability and statistics, signal processing, networks

2024 – 2026 **Preparatory classes for the Grandes Écoles (CPGE PCSI, then PSI*), Lycée Gustave Eiffel, Bordeaux**
Two-year intensive programme in mathematics, physics, engineering science and computer science, leading to the national competitive entrance exams

2024 **French Baccalauréat, with honours (mention Bien)**
Lycée Saint-Joseph de Tivoli, Bordeaux (2021 – 2024)

Experience

2022 **High-school work placement, LaBRI computer science research lab, Bordeaux**
Supervised by researcher Jean-François Marckert

- Wrote a Python program that generates random mazes and draws the shortest path to the exit

2022 **Volunteer, Le Pain de l'amitié charity, Bordeaux**
Two weeks of volunteering

Projects

2026 **Battleship game in Ada** in progress
Terminal game against an AI, split into packages

2023 **Cannonball simulation (Python, pygame)**
Projectile motion under gravity, integrated step by step and animated in real time

2023 **Sudoku generator (Python, OOP)** unfinished
Valid grids with adjustable difficulty, exported as images

2023 **French departments quiz and Pong (Python)**
Three game modes with high scores saved in JSON; two-player game built with pygame

Skills

Programming	Python (pygame, matplotlib, Pillow), Ada, C, introduction to Matlab
Tools	Git, GitHub, GitHub Pages
Languages	French, English, Chinese (second foreign language at ENSEEIHT)

Sports and interests

Swimming	14 years of competitive swimming, national level, from age 4 to the end of high school
Running	Bruges half marathon (2024), Centrale Lyon Raid (70 km trail, 3,000 m elevation gain over 2 days), registered for the Paris Marathon (April 2027); long-term goal: an Ironman
Other	Weight training (5 years), drums (3 years)
